SUMMARY

A dedicated and enthusiastic Computer Science Engineering graduate with hands-on experience in React.js, Node.js, Express.js, and MongoDB. Skilled in developing responsive web applications, reusable components, REST APIs, and database-driven solutions. Strong problem-solving abilities with practical internship and project experience, eager to learn, adapt, and contribute to real-world software development..

TECHNICAL SKILLS

Frontend
HTML5, CSS, JavaScript ES6+, React.js,Tailwind CSS

Backend
Node.js, Express.js, REST APIs

Database
MongoDB

Tools
Git, GitHub, VS Code, Vercel, Render, Figma, Canva

EDUCATION

Loyola-ICAM College of Engineering and Technology **2022–2026**
B.E. Computer Science and Engineering Chennai

Don Bosco Matriculation Higher Secondary School **2020–2022**
SSLC – 85.4% | HSC – 87% Paramakudi

EXPERIENCE

Frontend Developer Intern – Coding Space India Pvt. Ltd., Chennai **Feb–Apr 2025**

- Designed and developed responsive web pages that worked smoothly across different screen sizes and devices.
- Converted UI/UX designs into clean, functional, and interactive frontend interfaces.
- Built reusable React components to improve consistency and maintainability across the application.
- Optimized frontend performance by reducing unnecessary renders and improving page loading.
- Implemented responsive layouts and frontend interactions with focus on usability and user experience.
- Applied React Hooks and modern frontend techniques to build maintainable interfaces.

PROJECTS

SmartClinic System

- Developed a healthcare platform for managing interactions between patients and doctors in a single system.
- Designed interfaces for patient registration, doctor onboarding, secure login, and appointment management.
- Implemented appointment scheduling, digital prescriptions, appointment booking, and notification features.
- Reduced manual clinic work and made appointment management simple and efficient.
- Integrated React.js frontend components with Express.js REST APIs for communication with the backend.
- Configured MongoDB database connectivity using Mongoose for storing and managing application data.

RentEase

- Developed a rental marketplace where users can list furniture, appliances, and other items for rent.
- Implemented a dual-role system allowing users to switch between owner and renter within the same account.
- Built product browsing, search, rental, and user interaction features for a smooth rental workflow.
- Made it easier for users to rent products instead of purchasing expensive items for temporary use.
- Connected the React.js frontend with Express.js REST APIs for application data and user operations.
- Integrated MongoDB using Mongoose for storing users, products, and rental-related application data.

Voice to Vision

- Developed an interactive application that converts spoken input into Indian Sign Language (ISL) animations.
- Enabled users to learn signs for basic words and phrases through a simple voice-based interface.
- Helps reduce the communication gap between hearing-impaired individuals and the hearing community.
- Integrated an avatar capable of performing context-aware actions based on user speech.
- Used React.js and Tailwind CSS to build a responsive and accessible frontend experience.
- Integrated the frontend with an Express.js backend and MongoDB using Mongoose.

CERTIFICATIONS

- **MERN Full Stack with Grade "A"** – SLA Institute(Softlogic) **Aug 2026**
- **HTML, CSS, and JavaScript for Beginners** – IBM Developer Skills Network **Sep 2026**

ACHIEVEMENTS

- **National Pitch-a-thon Finalist (Top 6)** – VIT Chennai
- **Runner-Up (2nd), Coding Quiz Challenge** – RMK Chennai
